Colloids and Surfaces A: Physicochemical and Engineering Aspects, 81 (1993) 296–297
Elsevier Science Publishers B.V., Amsterdam

Subject Index

AAA surface, 289
Acid activated smectite, 211
Acylium perchlorate groups, 195
Adhesive-hard-sphere approximation, 181
Adsorption, 83, 217
Aggregation, 121
Aggregation behaviour, 281
Anionic surfactant, 161
Aqueous solution, 231
Archimedes' principle, 289
Asphalt pavements, 239
Atriopeptin III, 269

Binding constants, 281
Bubble charge, 13

Carbon whiskers, 195
Cellulose, 251
Ceramic membrane, 93
Ceramics, 25
Charged colloidal particles, 65
Chemical stability, 263
Coagulated colloids, 167
Colloid stability, 181
Concentrated dispersions, 65
Conformational change, 59
Copper compounds, 153
Crystallization, 273
Cyanide, 103
Cyclic ethers, 195

Differential scanning calorimetry, 203
Diffusion, 65
Dispersion, 167
Divalent cations, 281
Double flocculants, 17

Elastic stabilization, 239
Electrolytes, 83
Electron paramagnetic resonance, 25
Emulsions, 203, 273
Enhanced flocculation, 17
Enhanced oil recovery, 263
Ethanol, 203
Ethoxylated sulfonates, 263
Ethyl xanthate, 103

Fat properties, 139
Fibres, 251
Flax, 251
Frumkin–Damaskin isotherm, 1

Galena, 103
Gel model, 93
Glycine trimer alkyl ester, 59
Grafting, 195

Heterocoagulation, 83
n-Hexadecane, 273
Human serum albumin, 281
Hydrophobically modified hydroxyethylcellulose, 161

Interaction, 103
Interactions, 161
Interface, 217
Interparticle separations, 43
IR spectra, 59
Isoelectric point, 211

Lanthanum, 13
Latex particles, 161, 281
Lipids, 269

Mechanical treatment, 211
Metal oxides, 25
Microemulsion, 177
Microfiltration, 93
Molecular dynamics, 25, 217
Monolayer, 269
Multivalent inorganic salt solutions, 13

Natural rubber latex, 83
Nucleation, 231, 273

Oil exchange, 203
Oil-in-water emulsions, 121, 139

Partial coalescence, 121, 139
Particles, 177
Polyethers, 195
Polyethylene, 239
Polymer modification, 239
Polymer recycling, 239

Polymer surfactants, 25
Protein, 203

Quantized AgI clusters, 231

Ring-opening polymerization, 195

Sedimentation, 65
Self-consistent field, 217
Silica dispersions, 43
SiO_2, 177
Smectite, 211
Stability diagrams, 181
Stabilization, 231
Statistical thermodynamics, 181
Steric stabilization, 239
Supercooling, 273
Surface electrochemistry, 93
Surface oxide, 93
Surface tension, 251
Surface viscosity, 25
Surfactants, 1, 217, 273
Surfactant effect, 83
Synergistic interaction, 1

Thermal treatment, 211
Tin tailings slimes, 83
Titania, 153

Ultrafiltration, 65
Ultrasonication, 167
Ultrasound velocity, 273
Uniform coated inorganic colloidal particles, 153

Vapor/liquid transition, 181

Wetting, 251

Zeta potential, 93
